Event Rules & Format

General Guidelines:

This is primarily a solo participation event.

All prompts must be typed only in the instructed platforms— no other AI platforms (like ChatGPT, Midjourney, etc.) are allowed.

Participants are allowed to generate images using their account details.

Once you run out of credits, the last image generated will be considered your final answer.

No use of mobile phones or external help during the challenge.

Judges' decisions are final and binding.

Event Structure:

 Round 1 – Individual Round

Each participant is shown one AI-generated image.

You'll have 5 minutes to write and run a prompt on the given platform.

Submit the best image generated within time.

Top scorers advance to Round 2.

Round 2 – Team Round (Blind Prompting)

Top 10 participants from Round 1 will be selected.

They will be shuffled into 5 teams (2 members each)

In each team:

One member is shown the image and he/she has to describe the image to their teammate that they will have to replicate the image. The top three teams with less tokens consumed and great accuracy advances to the next round.

Round 3 – Final Individual Showdown

From the top 3 teams (6 people), each participant will now compete individually again.

Each finalist is given one final image.

You get only 3 minutes to craft and generate a prompt.

Final submissions will be judged on accuracy, creativity, and clarity.
