Syntax Strike rules and reg:

    Mobile phones should not be used during the rounds

    Paper will be provided

Round 1: Conducted on paper (probably 10 questions)   Time Limit: 15 minutes

Objective:

        Identify and correct the errors

        Participants will be given buggy code snippets in C, Python, Java

Winning Criteria:

        Participants with the most correct fixes

        In case of a tie, least time taken to submit the answers will be considered.

Round 2: Problem Solving (Hackerrank)   Time Limit: 30 minutes

Objective:

        Identify the problem statement and write code for them in real time

        Hints will be given after solving each problem

        Use the hints to find the mystery(will be decided what they are going to find for now)

Tools:

        Systems will be provided (C, Python, or Java — language chosen by the participant)

Judging Criteria:

        The minimum time taken to find the mystery
